[WE ARE PROBLEM SOLVERS]

## ABOUT US

We're a company established in 2020 in Cali, Colombia.

We are focused on improving our customers' experience through the construction of joint spaces in which we design **viable, feasible and scalable tech solutions.**

## OUR VALUE PROPOSAL

- Development of quality and secure solutions.
- Proposals of robust and scalable architectures.
- Analysis and understanding of critical business processes.
- A mature methodology that covers all stages of the solution.
- Understanding of the business sector, its particularities, transactionality and criticality.

# MOBILE SOLUTIONS

## Offline Inventory

### OFFLINE INVENTORY

This mobile application allows you to take inventory and verify its prices offline. Upload a base file and as a result a file with the records is obtained. All barcodes reading is done with Zebra devices.

## Maintenance Notification

### MAINTENANCE NOTIFICATION

Mobile solution integrated with the SAP PM module for the processing of preventive and corrective maintenance tickets, as well as the registration of orders and validation of spare parts stock.

## Production Notification

### PRODUCTION NOTIFICATION

Mobile application integrated into the SAP PP module for notification of production orders and consumption registration through reading the material barcode.

## Closed Loop Medication

### CLOSED LOOP MEDICATION

Mobile application integrated into the SAP ISH and i.s.h.med health vertical that allows the receipt, prescription and administration of medications to patients.
